PROJETS

mentorr.([link](#))

- This website helps you as a mentorr by guiding you as to how to master your subject.
- After you enter your subject in the search bar, click on the roadmap button and it will show you how to approach your subject from A to Z.
- made using HTML ,CSS , JS

REACT-RECIPE-SEARCH ([link](#))

- Users can search a recipe and the website will fetch results from an API and display the Ingredients and Procedure.
- Used the concept of de-bouncing
- made using REACT, AXIOS, API, MATERIAL-UI, STYLED-COMPONENTS

FILE SYSTEM ORGANIZER ([link](#))

- when users download files from the internet, this tool helps them segregate all the different files based on the extensions and places them in their respective folder
- Command-line tool
- Done using Node JS

CHAT-APP

- Implemented using Express and SOCKET.IO
